

FABIAN BACHMAYER

Vienna, Austria | bachy.dev | github.com/BachyDev | +43 699 17134810 | fabian@bachy.dev

Summary

Full-Stack Developer with several years of experience across telecommunications, freelance client work, and AI training. I contribute to all phases of the software development lifecycle, from requirements and design to deployment and maintenance.

Professional Experience

Freelance Developer | Remote 2023 – Present

- Developed a full-stack **authentication system** and integrated the **Viva Payments API** for secure transactions.
Tech Stack: Google Cloud, Firebase, Next.js, React, TypeScript, Node.js, Firestore, Cloud Functions, Tailwind CSS
- Developed an interactive **PDF editor** for contract generation within an energy-sector SaaS platform, featuring drag-and-drop element placement and **automatic field population** via multi-tenant databases.
Tech Stack: Laravel, PHP, Livewire, Alpine.js, Tailwind CSS, FPDI, TCPDF, DOMPDF, MySQL

AI Tutor – LLM Training (RLHF) | Remote 2023 – Present

- Contributed to the training of **large language models** on multiple platforms, refining model performance through reinforcement learning from human feedback.
Tech Stack: Python, JavaScript, TypeScript, SQL

Full-Stack Developer | spusu / Mass Response Service GmbH, Vienna 2021 – 2022

- Developed and maintained core telecom **billing system** functionality, handling large-scale data and complex business logic.
- Integrated the **cashpresso** installment payment method into the online shop, giving customers flexible payment options.
- Built a B2B **invoice mailing system** that automated invoice generation and delivery.
- Integrated an **exchange-rates** management API connected to the ECB Statistical Data Warehouse.
Tech Stack: Java EE, MySQL, Gradle, Jenkins, Swagger, JavaScript, HTML, CSS, GitLab

Portfolio Projects

Live demos and source code at bachy.dev/work

Firebase Webstore — Full-stack e-commerce platform with user authentication and secure **Stripe payments** (one-time and subscriptions) via Cloud Functions webhooks and Firestore real-time sync.

Tech Stack: Next.js, React, TypeScript, Firebase, Firestore, Cloud Functions, Stripe, Tailwind CSS

CRM Demo — Full-stack CRM application with a **RESTful API** and PostgreSQL database, built with clean architecture and containerized deployment.

Tech Stack: Angular, Spring Boot, Java, PostgreSQL, Docker, Gradle, Swagger

Hand Gesture Control — Touchless UI navigation via real-time webcam capture — computer vision translates hand landmarks into scroll and toggle commands.

Tech Stack: TensorFlow.js, MediaPipe, Next.js, React, TypeScript, Tailwind CSS

Skills

Languages & Runtimes: TypeScript, JavaScript, Node.js, Python, Java, PHP, SQL, HTML/CSS

Frameworks: React, Next.js, Angular, Spring Boot, Hibernate, Laravel, Tailwind CSS

AI & ML: LLM Training (RLHF), TensorFlow.js, MediaPipe, Ollama, Hugging Face

Databases: PostgreSQL, MySQL, Firestore

Cloud & DevOps: Google Cloud, Firebase, Supabase, Vercel, Docker, CI/CD, Git, Gradle, Maven

Testing & Methods: JUnit, Mockito, Agile, Scrum, BPMN

Spoken Languages: German (Native), English (Professional Working Proficiency), Spanish (Basic)

Education

Technikum Vienna | *Business Informatics*, 2018 – 2022

Completed all coursework, gaining extensive knowledge in software development and system architecture.

TU Wien | *Technical Mathematics*, 2017 – 2018

C and C++ programming within the curriculum.

Business Academy Donaustadt (HAK) | *Graduated* 2016

Focus on Information and Communication Technology.

Federal Civil Service | 2016 – 2017
