# CV - FABIAN BACHMAYER

## Full-Stack Developer

As a full stack developer with 4+ years of experience in the Java EE field, I have gained comprehensive knowledge and skills across the entire software development process. From frontend design to backend development, I have worked on various aspects of the development cycle and delivered successful projects. Additionally, I possess a passion for exploring and utilizing cutting-edge technologies to enhance the development process and deliver high-quality results. I am currently seeking freelance opportunities to apply my expertise and further develop my skills.
